AI4Belgium

AI4Belgium is a grassroots community that enables Belgian people and organizations to capture the opportunities of AI while facilitating the ongoing transition responsibly. This coalition brings together key AI players from the public sector, private sector, academia and civil society. AI4Belgium has the ambition to position Belgium, including its regions, in the European and global AI landscape.

HIGHLIGHTS!

European **AI** Week

The European Artificial Intelligence Week

March 14-18 2022

European AI Week

The European Artificial
Intelligence Week

March 14-18 2022

Why ?

- Contribute to building together
- an Inclusive, trustworthy, and ambitious European AI Ecosystem !

What ?

- 80 events on 7 main tracks and 7 highlights mainly online
- Open to all 12 hybrid events

When?

- 5days, 14-18 March + 1 bonus day
(Belgium and Regions, then France and Europe, and Friday global AI day)

Who ?

- 500 speakers from 27+ countries, with the presence of 6 Federal & Regional Belgian Ministers, EU Commission, MEPS, & top international keynote speakers;
- Gender balance 66% / 34 %

For whom ?

Citizen, Academics, AI startups & scaleups, SMEs, International corporate, public services, NGO

EIC Business Acceleration Services
Achievements in 2021-2022

#EUAIWEEK 2022 – A SELECTION OF QUOTES HEARD DURING THE SESSIONS

“

Prof. Holger Hoos, Head of CLAIRE, quoting Antoine de Saint-Exupéry in the opening of the session « Attracting and Retaining AI Talent in Europe »

« En ce qui concerne l'avenir, l'important n'est pas de le prédire mais de le rendre possible »

Raphaël Weuts, Vlaamse AI Academy, during the “Learning AI from 7 to 77” session

“Do you need AI now ? is like 30 years ago, do you need a computer ?”

Omar Mohout, CEO NOVAREPERTA, presenting his new book co-authored with Laurence Jacobs :

“If you ask me my prediction [...]. AI will be still the number one technology for many years to come in terms of investments”

Laurence Jacobs, AGORIA, presenting with her co-author her new “Nooit Nog Normaal” book :

“AI is like gravity. You do not see it, but it is there. And it has got a big influence on everything. Covid was an accelerator”

”

#EUAIWEEK 2022 – A SELECTION OF QUOTES HEARD DURING THE SESSIONS

“

Jeroen Franssen, Agoria, opening keynote of the panel “Future of Work” :

“Reskills & Upskills workers : 27 crucial skills needed in a digitalized world, from technical skills (coding) to Soft skills (empathy), in a global team ! (not in one person), diversity is needed too”

Rob Roemers

AI is not about Robots but "Co-Bots" : collaboration for working

Yann-Aël Leborgne, ULB, La Scientothèque, during the “Empowering next generation with AI” session on Friday March 18 :

“It's never too early! Kids are ready very early to find interest on these AI technologies through gaming. It's a full continuum “

Sébastien Deletaille, CEO ROSA, during the “Moonshot AI4Health : Belgium the promised land of Artificial Intelligence for Healthcare” session just after the opening ceremony.

“It's time that Belgium wake up and seriously commit to AI for healths care”

”

#EUAIWEEK 2022 – A SELECTION OF QUOTES HEARD DURING THE SESSIONS

“

Wim de Waele, The Beacon, AI4Belgium board member, at the closing of the “Women in AI” event :
I remain an optimist and do believe the world is evolving in the right direction. My mother, despite being a very smart lady, was not able to get a higher education and now my daughter is doing her phd abroad in a top university. The French writer Simone Veil phrased it very accurately when she said: ‘Ce monde est la porte d'entrée. C'est une barrière. Et, en même temps, c'est le passage.’

François Sénémaud, Ambassadeur de France en Belgique, at the opening of the Generation AI 2030 symposium, under the aegis of the French Presidency of the European Union :

« Aussi, nous espérons que cette journée sera l'occasion pour chacune et chacun d'entre vous d'en apprendre plus sur les projets hautement innovants qui sont actuellement développés en Europe, de faire des rencontres fertiles, de trouver des appuis stratégiques : en d'autres termes, d'ouvrir le champ de ses possibles. »

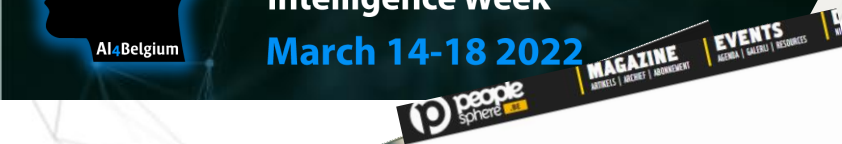

”

AI4Belgium

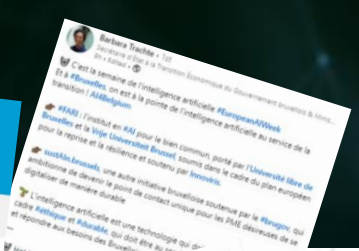

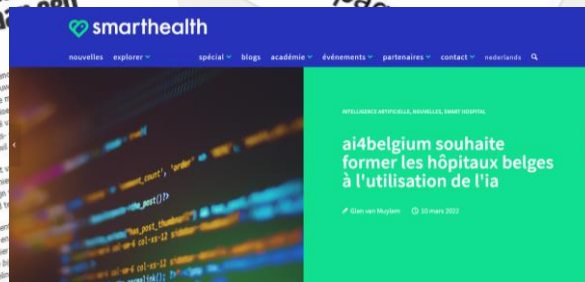

European AI Week: Bringing European AI to the World & Showcasing AI Excellence & Trust in Realities

Artificial Intelligence enthusiasts will have much to choose from for their interest in AI as the European AI Week commencing from March 14-18 with huge agendas under the two key activities taking place online and on-site in the EU and at EXPO Dubai.

The events are the "High-Level Forum on the EU Vision for Trustworthy AI in the World" in EXPO Dubai from 15-16 March organised by the European Commission's [InTouchAI.eu project](#) and the community-based event European AI Week from 14 - 18 March 2022 organised by AI4Belgium.

An overarching goal of the activities is bringing European AI approaches, which are based on two key pillars AI ecosystem of Trust and AI Ecosystem of Excellence, to the wider world and demonstrating the AI innovations in a series of areas with strong analyses on ethical, legal, and societal implications. The activities are organised and participated by numerous members, ranging from EU Commission, EU member countries, EU and international organisations and associations, civil groups, experts, academics, innovators, scientists, artists, and many others.

In BE hebben we heel wat AI-aanbieders, zo blijkt uit rapport van @Sirris_be Maar de implementatie staat nog. Tijdens de #EuropeanAIweek van @ai4_belgium ontdek je wat #AI voor jouw bedrijf kan betekenen:

- Wat is AI?
- Wat met ethiek?
- Wat voorziet de overheid rond AI?

#EUAIWEEK 2022 – What have you thought of the event ?

“The European AI Week had a “health” soul this year ! Artificial Intelligence needs a moonshot in healthcare, and our events insisted on how it is up to our national and European ecosystems to seize this challenge for the well-being of our citizens.”

Giovanni Briganti, CHU BRUGMANN, AI4HEALTH

«The ai week is an opportunity to take stock of AI in Belgium and to formulate a moonshot to make Belgium the center of AI for healthcare »

Thierry Geerts, CEO Google, Digital Mind for Belgium

“This week/event demonstrated the potential of AI across all industries, and the impact it will have on the way we work, live and learn in the years to come. I am amazed by the talent, knowledge and commitment of the entire ecosystem – and really believe Europe and Belgium specifically can play a leading role”

Bart Becks, Chairman EURACTIV, E-Health Valley, AI4Belgium AI4Media co-lead

« The place to be en Europe cette semaine en IA ! Des chercheurs passionnants dans l'audience et des speakers très disponibles pour répondre aux questions! Un top event! ”

Milie Taing, CEO Lili.ai, pitcher during Generation IA 2030 symposium

“A great initiative and I am very enthusiastic about the future which is announced with so many talents and motivation. we have the chance to build together, let's take advantage of it“

Florian Ernotte, Blockchain & Technology Lawyer

“A great example that proves that Belgium can become the AI champion”

Saskia Van Uffelen, Digital Champion for Belgium, Digital Mind for Belgi

“The greatest thing with AI4Belgium is not so much where we stand today, but understand and see in what direction we are moving. I adored this second version very much”

Mieke De Ketelaere, IMEC ID Lab, Prof. at Vlerick, Author, co-organizer of the “Startups and Scaleups in Belgium” on Friday March 18, 2022,

“This week was a unique opportunity to discuss all the relevant issues of AI, from health to law and geopolitics. With this first edition of the EU AI Week, AI4Belgium is paving the way for Belgium to become a vibrant European hub for AI and innovation. I can't wait for the next edition”.

Prof. Gregory Lewkowicz, Global Law Program Director, ULB, Université Nice Sophia Antipolis, HEC-Paris, Science Po Paris, organizer of the “Geopolitics of AI Standardization” session during the #EUAIWEEK 2022 with OECD, IEEE, AI4Belgium, et al.

The power is in the ecosystem – Belgium rocks when it comes to AI startups. Mieke De Ketelaere

How to accelerate AI Trainings? The key is crossing over skills ! Increase the offering of pathways for non-ai based backgrounds, it means every student in academic & non academic can, if they want, learn AI

AI is a never stop learning environment, people should learn on a recurring way.

AI is not about Robots but "Co-Bots" : collaboration for working

It's never too early! Kids are ready very early to find interest on these Altechnologies through gaming.
It's a full continuum.
